Event Manager with experience in planning, coordinating, and delivering national and international events across corporate, experiential, and fast-paced environments. Over the years, I have managed event operations involving logistics, suppliers, stakeholders, communication flows, and on-site coordination, working closely with internal teams, agencies, and external partners. My background in design and communication allows me to combine organizational skills with strong attention to detail, contributing to the overall quality, consistency, and experience of each project. I thrive in dynamic environments where coordination, flexibility, and problem-solving are essential to ensure smooth execution and successful delivery.
